

# Building Green

At Anchorage Sand & Gravel, a leader in our industry since 1938, we are committed to being part of the green building effort. This means we're not just committed to making better products, we're dedicated to increasing the product options for those interested in implementing sustainable building practices. We have worked hard on this initiative and are proud to offer recycled product lines that offer the ability to contribute to the LEED® Green Building Certification System. Anchorage Sand & Gravel's Aggregate Products are of the highest quality and have been designed to work as a leveling course, compactable fill or as an aggregate base course product.

## Sustainable Aggregate Products

### “Recycled” Aggregate Products:

- **Recycled Asphalt Pavement (RAP)** – Product I.D. #138025
- **Recycled Concrete Aggregate (RCA)** – Product I.D. #138023

### Aggregate Products:

- AS&G stocks a wide variety of aggregate products to meet the needs of any project.

### Construction Waste – MR Credit 2.1, 2.2

Recycle and/or salvage non-hazardous construction and demolition debris.

### Recycled Content – MR Credit 4

Both Recycled Concrete (RCA) and Recycled Asphalt (RAP) use materials with recycled content such that the sum of post-consumer recycled content plus a half of the pre-consumer content constitutes at least 10% or 20%, based on cost, of the total value of the materials in the project.

### Regional Materials – MR Credit 5

100% of AS&G's aggregate products have been extracted, harvested or recovered, as well as manufactured, within 500 miles of the project site for a minimum of 10% or 20%, based on cost, of the total materials value.

*Note: Recycled content varies by color for some products due to the recycled content of the material components utilized.*
